Annual E-governance Report for the AY 2023-24

In order to share information and manage human resources effectively and transparently through involvement and accountability from all stakeholders, the DRK Institute of Science and Technology has established e-governance. The college's Enterprise Resource Planning (ERP) is divided into two main categories, such as e-administration and e-services. E-administration makes use of ICT to facilitate information processing and decision-making for the institution's head, IQAC, governing body, and other committees established to decentralize administration. Numerous service facilities are offered by E-Service. In order to take advantage of the benefits of contemporary technologies accessible in the field of higher education, the majority of staff and students use smartphones.

Automation was used to create the student database, exam records, attendance management system, and continuous assessment log. A different supplier is chosen to offer the assistance required for the upkeep of the college website. The Department of Computer Science has created a specific online test portal, <http://bcexam.in>. Students can submit their answer scripts online after registering with this portal and submitting their personal information.

Instructors can post lectures and homework assignments on the same web platform. The computer science department faculty occasionally does maintenance. technologies that are available for use in higher education

For the purpose of exchanging instructions, information, and discussion on a single platform, a specific WhatsApp group has been established both at the institution level and within each academic department. The college provides the required financial allocations for the implementation of various government programs and digital awareness, and it guarantees proper use with the highest transparency within the allotted time frame.

Below are some examples of how e-governance is being used in various industries.

OVERSEIGNMENT:

Online timetable management was used for teachers.

All departments and faculty members have their own subdomain on the college website. Through the government portal, all tenders are called.

Every notification is posted on the college website.

Documentation pertaining to retirement is submitted via the e-pension portal.

FINANCE AND ACCOUNT: All financial processes are automated.

Government salary grants are received, and HRMS is used to distribute them. The college account is automated as well.

ENTRY AND SUPPORT FOR STUDENTS:

Admission process is fully automated from submission of forms to payment of fees.

Fees are collected online (linked via Billdesk)

E-brochure made available online for free of cost.

Admission register is generated.
